CURLING CLUB CALL FOR TENDERS FOR RINK

A general meeting of the Carbon Curling Club was held in the Municipal office last Thursday evening and a large number of the members were in attendance.

It was decided to call for tenders for a caretaker for the rink in the Municipal office building, tenders to be handed in before Monday night.

The committee appointed to look after the well reported that same had been completed and there was a water supply of about four feet.

Discussion arose as to the possibility of a force pump for the purpose of conveying the water from the well to the rink, and the matter was left in the hands of a committee to decide.

The curling fee was set at \$15 this year, as it was considered that the rink could not be managed with the fee any less than that sum.

It was decided to hold a Dance in the Farmers Exchange hall on Tuesday, Dec. 18, and a committee composed of Messrs. G. Malton, H. Jealous and E. J. Rouleau was appointed to make the necessary arrangements.

LENGLET-DEBUNSKI

A pretty and interesting wedding took place on November 27 at 9.30 a.m. in St. Rita's Church, Rockyford, when Mabel Agnes Debunski became the bride of Karl Albert Lenglet, son of Mr. and Mrs. H. Lenglet of Rosebud. Rev. Father Killan officiated.

The church was artistically decorated with ferns and yellow chrysanthemums. The bride looked charming in a wedding gown of blue georgette with bodice embroidered in peach. She carried a bouquet of roses and ferns. Miss Irene Grenier acted as bridesmaid. She wore a pale green crepe de chene frock with a silver metallic hat and carried a bouquet of pink carnations and ferns. The groomsmen were Victor Grenier. The reception was held at the home of the groom's parents, where a sumptuous dinner was served to thirty guests.

Later the happy young couple left for a honeymoon trip to Calgary and Banff and on their return will reside east of Rosebud.

SCHOOL REPORT

GRADE V—Frances MacDonald, Cecil Pimm, Willie Fox, Charles Code, Elsie Bramley, Charles Moore, Stella Dodyk, Ethel Wiers, David Kaiser, Aena Jewell, Albert T. Kotte, Billy Oliphant.

GRADE IV—Fergus Greenan, Betty Code, Finlay Code, Jack Evans, George Jealous, William Graham, Robt. Wise, Willie Batsch, Verl Jacobs, Sidney Bramley, James Hunt, Wayne Hilstob, Casswell Jewell.

GRADE III—Willie Amos, Agnes Skerry, Gladys Bramley, Sam Malton, Betty McQuade, Stanley Ramsay, C. Nash, William Dixon, Raymond LeMay.

GRADE II—Ernest Fox, John Rogers, Elmer Wolf and Jack Batsch, Cecil Trumbley, Harold Wise, Douglas Prose, Benny Zeigler, Marge Hesselgrave, Marjorie Leitch and A. Wolf.

GRADE I A—Irma Jacobs, Elwood Kaehn, Mae Moore.

GRADE I B—Isabel Gieldie, Bill Code, Elaine Torrance.

GRADE I C—Goldie Hilstob, George Moore, Billy Heath.

GRADE I D—Victor Kaehn, Lillian Dixon, Lucille LeMay.

Think this one over. We tried it for an hour or so and almost came to blows with three arguers, each of whom had a different solution. What's yours?

A debtor seemed really anxious to settle a \$3.00 delinquent account. He had only \$2.00, a crisp new bill. He took it to a pawnbroker and pawned it for \$1.50. He sold the pawn ticket to a sympathetic friend for \$1.50. He then had in his jeans the much desired \$3.00 and settled the bill. Who lost?

LITTLE ITEMS OF LOCAL INTEREST

Butch Leitch has just received a stock of Christmas trees. All prices get yours before they are all gone. At the big livery barn.

Born, to Mr. and Mrs. Leo Halstead, on Wednesday, Dec. 5, a son.

A large crowd was present at the dance, held on Tuesday night in the Farmers Exchange hall, under the auspices of the Catholic Women's League, and a most enjoyable time was had by all. During the evening the Hope Chest, on which a large number of tickets had been sold, was riddled off and the holder of the lucky ticket was Mrs. F. LeMay, ticket No. 81. In the second drawing Miss Margaret Hickey of Calgary, ticket No. 871, won the woollen comforter; and in the third drawing Jas. Shaw of Calgary was the holder of the lucky ticket, No. 1741.

LOCAL STORES ENTERED; THIEVES GET SOME LOOT

Carbon citizens awoke on Thursday morning last to find that three of the local stores, The Farmers Exchange, Wilkinson Hardware and the Carbon Trading Co., had been entered the night before and goods and merchandise stolen. Entrance was forced in to the Farmers Exchange and the Carbon Trading Co. by breaking windows at the rear of the buildings, and into the Wilkinson hardware by taking out the panels in the door. The amount of the goods taken has not been estimated, but it was not a great deal at any of the stores, the only cash taken being \$6 from the Carbon Trading Co. The local police are working on the case.

The Family Herald and Weekly Star of Montreal is not only a money maker but a money saver to the farmers of Canada. While the farmer's family circle, in the accompanying magazine, gets what is admitted to be the best of all.

WORLD HAPPENINGS BRIEFLY TOLD

There are more rats than humans in Buffalo, according to a report by Francis E. Franczak, city health commissioner, in urging a campaign to reduce the rodent population.

At the Royal Fair, Toronto, J. E. Falconer, of Govan, Sask., won the Carlswright trophy, the championship cup, with his three-year-old Clydesdale, Lochinvar.

Earl Jellicoe, retired admiral of the fleet, has been appointed director of the Midland bank. He is already a governor of the Bank of New Zealand, in which dominion he was formerly governor-general.

Bavaria has decided to publish a number of secret documents, including Crown Prince Rupprecht's war diaries. It is believed the diaries and archives will reveal many important clues to events of the World War.

Admiral Reinhard-Scheer, who directed the German fleet at the battle of Jutland on May 31, 1916, against the British fleet, is dead at the age of 65. His death occurred as he was travelling from Dresden to Mannheim.

Saskatchewan has been successful in taking first and third prizes in the extracted honey class at the Toronto Winter Fair. H. C. Baker, of Fielding, Sask., was awarded the first prize and Walker L. Bunavon, of Crichton, the third.

LONG SLEEP MAKES BABY HAPPY AGAIN

"Our baby kept waking us several times a night, until we started giving him a little Castoria after his last nursing," says an Iowa mother. "He slept soundly from the first night and it made him look and feel worlds better." Baby specialists endorse Fletcher's Castoria; and millions of mothers know how this purely-vegetable, harmless preparation helps babies and children, with colic, constipation, colds, diarrhea, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid imitations.

There are 300,000 more men than women in Canada, 100,000 more men than women in Australia, and 26,000 more men than women in New Zealand, while in England there are over two million more women than men.

Wise mothers who know the virtues of Mother Graves' Worm Expeller, always have it at hand, because it proves its value.

Nickel ore from the deposits near Sudbury, Ontario, is now being raised and smelted at the rate of 1 1/2 million tons per year and the ore reserves are placed at over 150,000,000 tons.

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes: "I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Canadian National Railways Design New Type Locomotive

Represents Revolutionary Advance in Motive Power Equipment and May Supersede Steam Engine

A new locomotive which represents a revolutionary departure from all present standards and practise and which may render the steam locomotive as extinct as the "dodo" has been placed in service by the Canadian National Railways. Presenting a tremendous advance in the use of the oil-electric type of locomotive it forms a distinctive offering on the part of Canadian engineers towards the solution of the transportation problems of this continent. As the National System was the pioneer, three years ago in placing in service the first oil-electric car of 200 horse power rating, its engineers have maintained leadership by the introduction of this locomotive, new in character and design for fast passenger and freight service.

When the first oil-electric car was put into service by the Canadian National Railways, it established two world's records in rail transportation by a continuous run from Montreal to Vancouver, a distance of 2,937 miles, in 67 hours, and by a continuous operation of the engine during that period, the longest non-stop run in rail history. The new oil-electric locomotive is considered to be capable of even greater performance.

The new locomotive is the further practical application of the use of fuel oil in railway transportation in which an oil engine is used to drive a generator for supplying electrical energy to the propulsion motors. Power and speed are obtained at costs far below those of coal fired steam driven locomotives.

Simple To Operate

In appearance it resembles the electric type. The operation is simple, the engineman directing the propulsion by means of a controller similar to that used on an electrically driven tramcar. This controller and an airbrake valve give the driver complete control of the locomotive. For his guidance, a series of meters and gauges furnish complete information regarding voltage, oil supply, and air pressure. The locomotive consists of two units, which may be operated jointly or independently, as required, and it is one unit which is now in service. When the second unit is completed and ready for service, the two will be coupled and will proceed to various cities, so that the public generally may have an opportunity of inspecting this new product of the enterprise of the Canadian National Railways.

The locomotive weighs 650,000 pounds when fully equipped, 480,000 pounds of which are carried on the driving wheels. Each unit consists essentially of an oil engine generator set mounted on the locomotive frame, boiler equipment for the steam heating of passenger coaches, four traction motors for propelling the locomotive airbrake and other auxiliary equipment.

The power developed by the oil engine is converted into electrical energy by the generator, transmitted to the traction motors geared to the driving axles, where it is utilized in developing traction effort and speed. With the present gear ratio, which was laid out for high speed passenger service, the locomotive will develop a tractive effort of 100,000 pounds during the accelerating periods. This compares with a tractive effort of 65,000 pounds developed by the largest steam locomotive now in use on the lines of the company in Western Canada.

Carries Much Fuel

Each unit carries approximately 8,000 pounds of fuel oil, 11,000 pounds of boiler water, 3,000 pounds of engine jacket cooling water, 1,000 pounds of engine lubricating oil, and 3,000 pounds of sand. The supply of oil will be sufficient for operation of the oil engine and the oil-fired heating boiler, operating under average conditions, for twelve hours. The supply of boiler water will be sufficient for heating a train of average length for periods of from six to twelve hours, depending upon outside temperature. The locomotive will handle the heaviest passenger train at a high schedule speed.

The power plant contained in the locomotive is sufficient to furnish energy for lighting a good-sized community, while the heating apparatus, which will provide comfortable temperatures in the cars even in severe weather, could heat a large modern apartment.

The inspiration and the design of the locomotive originated with motive power engineers of the Canadian National Railways. The oil engines were supplied by the William Boardman Company, Limited, of Glasgow. The electrical generators, motors and auxiliary electrical equipment were supplied by the Canadian Westinghouse Company, Limited, of Hamilton, Ont. The cabs and running gear were built and assembled on the frame by the Canadian Locomotive Company, at their works in Kingston, Ontario.

Minard's Liniment for Asthma.

There are now, on an average, six times as many divorce cases brought before English courts as there were in pre-war days.

Soldier Settlement Board

Over Million Acres Of Vacant Crown Land Taken Up In Alberta During 1928

According to a report compiled by the District Superintendent of the Soldier Settlement Board, 1,106,400 acres of vacant crown land were settled in central and northern Alberta during 1928. Of this acreage 4,131 quarter sections were filed on in the Peace River country, and 1,456 homesteads and 78 soldiers' grants were taken out in the Edmonton District.

NEGLECTED ANAEMIA

Often Leads To a Decline—Enrich the Blood By Taking Dr. Williams' Pink Pills

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time, for it is when strength is sapped by rapid growth that anaemia develops. The first signs may be noticed by peevishness, languor and headaches. The face grows pale, breathlessness and palpitation follow, with low spirits.

At the first symptom of anaemia mothers should act at once. Neglected anaemia often leads to decline, but if you see that your daughter's blood is enriched there need be no cause for anxiety. The finest blood enricher ever discovered is Dr. Williams' Pink Pills. The pure, red blood created by these pills will quickly banish all signs of anaemia. They will build up your girl's health and ensure her a robust girlhood. Give your daughter a course of Dr. Williams' Pink Pills now. Make her strong like thousands of girls who have been rescued from the clutches of anaemia by Dr. Williams' Pink Pills. Here is a bit of proof.

Miss Mary Venditti, Catamount, N.B., says: "Three years ago while attending a convent, I studied very hard to graduate. The result was I became very nervous and got so thin and pale my teachers thought they would have to send me home. I took different kinds of medicine which my parents sent me, but my condition remained unchanged. At last one of my teachers gave me a box of Dr. Williams' Pink Pills, and I had hardly finished it when I could feel an improvement in my condition. I continued the use of the pills for some time longer, and I can hardly tell all the good they did me. I gained in strength and weight, and the color returned to my cheeks, and at the end of the term I graduated. I never fail to recommend Dr. Williams' Pink Pills to my friends and acquaintances when a tonic is needed."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Geodetic Surveys

The principal function of the Geodetic Survey of Canada, which is a subdivision of the Surveys Bureau of the Department of the Interior, is to furnish latitude, longitude, and elevation data for all surveying and mapping operations in the Dominion.

The Oil For the Athlete.—In rubbing down, the Athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Taylor: "There's nothing like an appropriate setting, is there?"

Bailey: "I suppose that's why the plants in a hotel lobby are always palms."

ECZEMA BROKE OUT IN RASH

Child Very Cross and Fretful. Cuticura Heals.

"When my little sister was four months old eczema broke out in a red rash which later formed blisters. It itched and burned causing her to scratch. She was very cross and fretful, and used to lay awake half the night. The trouble lasted six months."

"A friend recommended Cuticura Soap and Ointment so my mother purchased some and after using five boxes of Cuticura Ointment and three cakes of Cuticura Soap all signs of the trouble disappeared. She was healed." (Signed) Mrs. Thomas Canning, Clarksville, N. S.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

343

For Modern Youth

Paris created this chic blouse for youth and youthful type of woman. It has distinctive band trimming, which provides unusual scheme for color and fabric contrast. It is cut from neck at centre-front and bound and finished for closing, but if preferred, can also be closed on left shoulder. The applied neckband is finished with flat tailored bow, which treatment appears on applied front bands that form chemisette. Two parts to pattern! The upper part of slashed edges at each side of front and back are gathered and joined to lower part, to achieve flat hipline, and slight blousing at sides. Style No. 343 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust, and takes but 1 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrast for 36-inch size. Beige jersey with brown, two tones in silk crepe in blue or new green, black and white lame, caramel crepe satin, novelty silk crepes and georgette crepe in scarlet red with black sheer velvet, are ultra-smart. Pattern price 25 cents in stamps, or coin (coin preferred). Wrap coin carefully.

British Youths For Saskatchewan

One Hundred Boys Will Arrive From Britain In the Early Spring

Saskatchewan has now entered into a plan initiated by Lord Lovat, Under-Secretary of State for Dominion Affairs and Chairman of the Overseas Settlement Committee in Great Britain, by which one hundred boys will arrive in the early spring of 1929, all chosen by the Empire Settlement Committee. They will be 16 and 17 years old and the Boy Scout type. At a hostel at the University of Saskatchewan, they will be received, instructed, supervised, and given after care, the Imperial Government paying one-half the cost, and the Federal and Provincial Governments paying one quarter each.

Fortune Teller—And above all, sir, you must beware of a tall, heavy set lady with blue eyes.

Client—A white hat and blue dress—thank you, I knew that beforehand—that's my wife.

Check Colds with Minard's Liniment.

SUNDAY SCHOOL LESSON

DECEMBER 9

PAUL GOES TO ROME

Golden Text: "I am not ashamed of the gospel: for it is the power of God unto salvation to everyone that believeth."—Romans 1.16.

Lesson: Acts 27.1-28.31; Romans 1.8-15; Philipians 1.12-14.

Devotional Reading: Psalm 91.9-16.

Explanations and Comments

The End Of the Journey To Rome, verses 11.15.—Three months after the shipwreck off the island of Malta, when navigation began in the early spring, Paul and the rest of the company set sail in a ship from Alexandria called "The Twin Brothers" from the sign painted on its prow. They stopped for three days at Syracuse, on the island of Sicily, and for a day at Rhegium, on the Italian coast. Puteoli, the corn mart of Italy, on the Bay of Naples, was the destination of the ship. There a week was spent. News of Paul's coming to Rome reached the Christians there, and two companies journeyed over the Appian Way to meet him, one coming as far as the Market of Appius, forty-three miles from Rome, and the other to the Three Taverns, an inn ten miles from Rome. Their coming greatly rejoiced and encouraged Paul: he thanked God, and took courage.

"It was midway between a shipwreck and a prison; Paul has been in peril of his life, and he was going into greater peril. He had barely escaped the storm to fall into the hands of Caesar. In this sad plight, a little group of Christian brethren in Rome, having heard that Paul was coming, went out to meet him; and his heart filled with gratitude. When he saw them he thanked God and took courage. Thus it is that they who have lost almost everything, count up the gifts of God which still remain and are surprised to find them so many and so precious. They appreciate them the more highly for their fewness. Some people have so much to be thankful for that they are not very thankful for anything."—George Hodges.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective.

Canadian Apples In Britain

Canada's apples are becoming more popular in the British Isles. Exports so far this season, according to figures published by the fruit branch of the Department of Agriculture, amount to 183,062 barrels and 515,322 boxes. This is a substantial increase over the totals of 143,012 barrels and 211,943 boxes for 1927, and 160,144 barrels and 403,025 boxes for 1926.

Asthma Overcome. The triumph over asthma has assuredly come. Dr. J. D. Kellogg's Asthma Remedy has proved the most positive blessing the victim of asthmatic attacks has ever known. Letters received from thousands who have tried it form a testimonial which leaves no room for doubt that here is a real remedy. Get it today from your dealer.

The majority of the people in the world will be speaking English in 50 years' time, according to one expert.

Be sure you're right, then check your figures.

CHAPTER VIII.

One calm Sunday morning Donald paddled across the lake to try the fly at the mouth of the small creek which flowed past the trapper's cabin. The clear water was as smooth as glass and the trout refused to be lured from the depths. After casting steadily for fifteen minutes without a rise, he sat down to enjoy a smoke. Sounds from afar came with surprising clearness through the quiet air. Andy was splitting wood outside the cabin door, and the sound of his axe and the words of his song brought a medley of returning echoes. Loons gabbled, wild ducks of many varieties shifted their positions with a whistling rush of wings. The "chee-ry chee-ry" of a flock of chickadees sounded from a copse of willows on the creek bank. The warmth of the morning gave promise of a hot day when the sun should reach the zenith. A breath of cool air rippled the lake's surface, bringing with it the faint rumble of a waterfall high up the mountain-side. Donald paddled to the shore, crossed the rustic bridge to where the trapper was working in his garden, and sat down on a convenient stump.

"Good-morning, John."

"Mornin', ol' timer."

"John, is there a waterfall on the big creek?"

"Yes, I've heard 'em, an' I've seen 'em from the ridge, but I ain't ever bin close to 'em."

"Do you think there would be any fish at the foot of the falls?"

"Couldn't say ol' timer. It ain't never bin fished."

To the disciples of Isaac Walton the expression "never been fished" brings an incomparable thrill. To cast a fly on virgin waters is the acme of bliss to an angler. Donald unjoined his rod, slung his basket over a shoulder and started toward the trail.

"Ye better let me fix ye up a lunch to take along," the trapper shouted after him.

"Good suggestion," admitted Donald as he retraced his steps.

Fried eggs placed between slices of snow-white bread, fresh doughnuts, cake and cheese were quickly

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She's working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANCE, 44 Langan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—MRS. ALFRED OUELLETTE, Pinewood, Ontario.

W. N. U. 1762

prepared by the deft hands of the old trapper, and Donald was again on his way.

He tried to follow the stream, but the sides were so precipitous that he was forced to climb to the ridge or "hog-back." Here he found the walking excellent, as there was no underbrush and the ground was covered with a soft moss.

At intervals through the park-like pines he caught the glint of running water in the gorge below. The air was warm, but the gentle zephyrs wafted from the glacial stream brought a coolness that was almost chill. The sound of the falls became louder as he climbed higher, increasing to a trembling roar as he came to the edge of a boulder-strewn precipice. Here there met his gaze a tumbling cascade of water, falling from a cliff to an iridescent pool sixty feet below.

Donald scrambled and slid to the lower level, only to find that he would have to walk down stream and wade up in order to get within reach of the pool. By leaping from rock to rock he managed to reach a flat ledge near the side that allowed him perfect freedom for casting. The spray reached him in the form of a fine mist that felt grateful after his exertions. A shaft of brilliant sunshine, looking like a searchlight where it penetrated the heavy mist, was reflected and refracted to form a rainbow that shone resplendently against the dark wall of the canyon. On each side rose a sheer wall of rock, with here and there a small fir or spruce clinging to fissures where sufficient earth had accumulated to give it nourishment. At the point where the cataract struck the pool there was a mass of heaving, foaming water that spread in ever lessening waves to become gentle ripples lapping softly on the shores.

The little birds known as water-cusels, or dippers, were in their element. Standing on the rocks around which the turbulent waters roared, they bobbed and curtsied, then flew in under the waterfall to their nests in the damp niches of the rocks. Far overhead, like a speck in the azure sky, a bald eagle careened and soared. Over all was the thunder of the cataract drumming in Donald's ears and giving to the earth a gentle tremor.

He began eagerly to joint his rod, attach leader and flies, and unfold his landing-net. "There," he said, when he had completed the task, "I'll just throw that in to soak while I have a smoke."

He cast carelessly, laid the rod down and reached for a cigarette. "B-r-r-r-r," the reel shrieked madly. He made a wild clutch for the rod, retrieving it just as the tip entered the water. A big rainbow trout leaped into the air with a flash of prismatic colours, and made that graceful curve that is so pleasing to the fisherman's eye. The five-ounce rod bent double as he checked the trout's rush. Then the line slackened as the fish turned and came toward him with incredible speed. He reeled frantically to take in the slack line. Once more the gamey trout turned and the line was singing with the strain. Suddenly it went straight down and in the pellucid depths he could see it lying near the bottom with tail and fins moving listlessly. Slowly he reeled in the line, bringing the fish nearer and nearer. With landing-net extended Donald leaned forward; but with a quick flit of its tail the trout shot to the surface, sending a shower of spray in his face. Then, leaping and dashing—the reel singing merrily—it crossed the pool with renewed energy. Unexpectedly the whirl of the reel ceased and the rod was nearly jerked from Donald's hands—a detested "back lash." In other words, the line had tangled at the reel. The slender rod was bent nearly to a circle.

"It won't stand it," muttered Donald in a fever of excitement. He lowered the tip slowly to relieve the strain on the rod, all the while working desperately to free the tangle. Snap! The fish with a tremendous tug parted the leader, and with one last triumphant leap to flaunt its brilliant colours, it disappeared.

It is universally understood among the angling fraternity that when a fish is lost under such conditions the Recording Angel turns her head.

In an hour the cold spray from the glacial water had dampened Donald's clothing and benumbed his fingers. The basket by then being nearly full, and his wrist lame from casting and

playing the fish, he decided to quit. As he climbed the ridge the air above felt like a breath from an oven in contrast to the atmosphere of the canyon.

Through a tall, stately grove of pines Donald descried an open glade whence came the sound of running water. He walked through the dark aisles of towering trees, his feet making no sound on the thick carpet of soft needles. Pushing aside a growth of low deciduous trees that fringed this open passage in the woods, he gazed upon a scene that held him entranced. At some time in the earth's remote history moving ice had gouged out this tiny valley and left a rich deposit of glacial silt. A small mountain stream cascaded from a moss-covered cliff to fall from ledge to ledge and flash crystal clear and sparkling through the vividly green grass and bright flowers which formed the carpet of the valley floor. The brilliant columbine, interspersed with the yellow marigold and dandelion, made bright splotches of colour. Wild roses hung in masses in the border of low green shrubs. The white rein orchis grew in rank profusion everywhere, filling the air with its delicate perfume. Ferns and cotton grass grew to the very edge of the limpid brook that prattled musically over the moss covered stones. A rabbit with her young nibbled at the tender grass roots at the far side of the creek. Humming-birds buzzed back and forth and a bluejay—the Paul Pry of the woods—peered curiously down at the interloper, with its head moving from side to side and its beady eyes shining. Then with a startled shriek it flew across the glade—like a streak of blue in the sunshine—to hold excited colloquy with its mate. A willow grouse sailed from a cliff above to land with a great preening of feathers and move with a peculiar gliding run to the shelter of a stand of salal bushes.

Near the centre of the field was a "fairy ring" of mushrooms about twelve feet across. The beginning of these rings may be a single mushroom which drops its spores in a circle about its base. The next season a smaller ring of mushrooms drops a larger ring of spores, and so the circle expands year by year, exactly as the ripple spread out on the surface of a pond when a stone is cast into the water.

Some fairy rings have been estimated to be six hundred years old. Legend informs us that these rings are magic circles within which elves and other nimble fairy folk hold their revels at midnight. There is another superstition that the rings mark the spots where bolts of lightning have struck the ground.

"A fairy-land" breathed Donald as he stepped into the open.

It was warm, but now and again a breeze, that had swept between snow-capped peaks, dropped down into the valley and made the pines sway and the willow and alder leaves coolly rustle. At the time of these visitations Donald threw back his head and drew in deep breaths of the flower-scented breeze.

Making his way to the foot of the tiny falls Donald seated himself on a soft bed of moss and proceeded to eat his lunch. Two birds, of the species known as "camp-robbers" or "whiskey-jacks," dropped ghost-like from nowhere and eyed him reproachfully. He threw them a crust of bread. There was a shrill cry like that of a hawk, that sent the feathered visitors in terror to the safety of the trees, and a flash of blue landed on the bread. With a chuckle, almost human a bluejay flew to the top of a spruce to enjoy his meal at leisure.

Donald's happy laugh rang throughout the sylvan glade and was re-echoed mockingly from the cliffs. The camp-robbers emerged from their retreat looking rather crestfallen. They took no chances with the crust thrown to them the second time. Each seized a generous portion and retreated hastily.

Donald selected a soft spot in the shade of a small grove of cedars, stretched himself at full length on his back, and lighted a cigarette. The sound of murmuring waters, the rustle of leaves, the gentle sighing of the pines, and the fragrant, balmy air that fanned his face held a soporific influence. He watched a fleecy cloud floating far above the tree-tops in the ethereal blue. A long-tailed wren, of the white throat and white eye lines sang joyously from a tree nearby.

SAVE THE VALUABLE
"POKER HANDS"

Donald's eyes closed slowly, and in a moment he was in a doze. As though in a dream he felt something brush his face and he shook his head. An instant later the tip of a cedar bough fell fairly on his face. He brushed quickly with his hand as though to dislodge a fly. A larger branch fell with a gentle swish to land on his nose. This time he opened his eyes and plucked the branch from his face, noticing as he did so that it was freshly broken. "Odd," he thought, and lay with eyes half-closed to detect the cause of this singular occurrence.

Near the top of the four small cedars under which he lay there seemed to be a nest-like thickness. There was a movement in the tops of the trees, and Donald's amazed eyes saw a little brown hand steal forth holding a cedar tip. Then a small childish face appeared, surrounded by a mass of lovely golden hair. The face was one of sheer, exquisite blonde beauty, marked by a pair of wide, roguish blue eyes, as blue as pansies, a small pensive mouth that formed a cupid's bow, and an impudent little nose dotted with freckles. As the slender hand loosed the branch, Donald's astonish-

ed eyes looked up directly into the blue ones looking down on him so full of mischief. There was a startled gasp and the golden head disappeared amid a great swaying of branches.

Donald came slowly to his feet, rubbing his eyes. Was this a fantastic dream, or had he actually seen a child's face? He looked at the branches on the ground, and again his eyes sought the tree-tops. He could now see that some sort of big nest was built within the tops of the four small cedars.

"Hello," he ventured.

A slight rustling of the branches followed, but no answer.

"Hello, wood-nymph!"

Tally Ho! For the Royal York Course

This old-time stage coach will run twice daily from the new Royal York Hotel, Toronto, to the new Royal York golf course, which is under construction in the beautiful Humber Valley area. The coach originally belonged to Major-General Sir Henry Pellatt, C.V.O., K.C.M.G., and will be used for the conveyance of guests of the Canadian Pacific hotelery, who will call after the approved fashion of a by-gone day at the Old Mill for the refreshment of man and beast. The route will be via the Lakeshore Boulevard, Sunnyside and the Humber Boulevard.

Announcing -

The Outstanding Chevrolet of Chevrolet History - a Six in the price range of the four!

THE Chevrolet Motor Company of Canada, Limited, announces The Outstanding Chevrolet of Chevrolet History . . . a Six in the price range of the four!

Spectacular as Chevrolet's achievements have been in the past . . . notable as its engineering triumphs have proved themselves to be—this remarkable new car dwarfs every previous Chevrolet accomplishment. Not only does it introduce into the low-priced field an entirely new measure of performance, comfort, beauty and style—but it is sold at prices so low as to alter every previous conception of motor car value.

The new six-cylinder valve-in-head engine—developed from more than a hundred motors designed especially for this sensational car—stands out as an engineering masterpiece. With a power increase of approximately 32% over the previous Chevrolet motor, with sensationally greater speed and faster acceleration—it offers a type of performance that is literally astounding . . . even to those who have been driving cars costing hundreds of dollars more.

<i>At Factory, Walkerville Government Taxes Extra</i>	

Throughout the entire speed range, it performs with a smoothness and quietness of operation that have never before been approached in a low-priced automobile. At the slower speeds of city traffic it idles along with wonderful silence and ease. On boulevards and country roads it responds with an eagerness that is a constant delight. It takes the longest and steepest hills with an abundant reserve of power that is a source of pride to the driver.

And its economy of operation averages better than 20 miles to the gallon of gasoline!

In appearance, this Outstanding Chevrolet is so smart, so stylish and so distinctively appointed that it rivals the costliest custom creations. The new Fisher bodies are longer, lower and roomier with adjustable driver's seat in all closed models—and reveal the matchless artistry of Fisher designers. You are cordially invited to visit our showroom and secure complete and detailed information on this sensational new car which will be ready for delivery beginning January 1st.

Employment officials at Regina state that out of the 6,000 British harvesters brought to Saskatchewan, at least 75 per cent. will remain in the West to become permanent Canadian citizens.

A 700-pound sea cow was shot the other day on the shore of Sea Cow Pound, Prince Edward Island an inlet which once swarmed with these gregarious, aquatic mammals but which are now a rarity. The animal was bought by a Summer-side manufacturing concern which used the hide for leather, the flesh for fox meat and the fat for lubricating oil.

Here and There

(159)
The new Canadian Pacific liner, "Duchess of York" has been launched at Clydebank, Scotland, by Her Royal Highness the Duchess of York. H.R.H. the Duke of York and other notables were present. The vessel is of 20,000 tonnage, and is the fourth and last of the "Duchess" quartette of steamships built for the service of the St. Lawrence route.

Two hundred Chinchilla rabbits accompanied by a ton of special food for their twelve thousand mile journey from England to New Zealand were recently handled by the Canadian Pacific Express Company. The little animals were bred in Lincolnshire and are to serve as a nucleus of a rabbit fur farm in Auckland. As rabbits are regarded as a pest in the Antipodes special arrangements had to be made to allow them to enter the country.

George Jihavlec, son of the Finance Minister of Czechoslovakia, is the latest addition to Alberta's list of notable farmers, led by H.R.H. the Prince of Wales, whose E. P. ranch is only one royal demesne among several, including that of the Duke of Sutherland. Young Jihavlec, who is only 22 years of age, has settled near Lethbridge, where he is gaining farm experience on the farm of C. R. Daniel before launching out for himself.

Thirty-five visits and departures of Canadian Pacific steamships will be made in and out of the Port of Saint John during the coming winter season, between December 1st and April 26th, it is officially announced. This represents an increase of three over the previous season. The two new "Duchess" class steamers, the "Duchess of Richmond" and the "Duchess of York," make their first appearance on the sailing list, the former being due in New Brunswick on March 23rd and the latter on March 30th.

The promotion of two of Canada's best known hotelmen to important posts in the service of the Canadian Pacific Railway has been announced by the hotel department of the company. B. A. Neale, manager of the Chateau Frontenac at Quebec, has been appointed manager of the new 1,200-room skyscraper hotel in Toronto, the Royal York, which will be opened to the public next summer. His place in the great hotelery at Quebec will be taken by John Johnston who has been assistant manager at the Chateau for some time.

The distribution of dividend money every three or six months to shareholders of industrial and commercial enterprises in Canada runs into many millions of dollars a year. The money goes to an army of people throughout the country, many of whom depend on it for their living and it has much to do with the continued prosperity of Canada. About 88 companies are listed on the Toronto Stock Exchange, a small part of the total number of those making regular dividend disbursements in Canada, but for the third quarter of this year these 88 companies distributed in dividends over twenty million dollars, of which the Canadian Pacific alone accounted for \$7,500,000. This was by far the largest distribution by any one company, the next largest being \$981,600. The number who regularly benefit by these distributions of profits is increasing every year, thus showing a more general tendency on the part of the Canadians to invest their earnings in the stocks of well established and sound industrial concerns.

The Sunshine Fund, organized by
The Calgary Herald in 1912 may be
described as a romance in philanthropy.
Year by year the total amount sub-
scribed by generous contributors has
increased and with the augmentation
of the fund the opportunities to assist
the poor and deserving have developed
in like proportion. More than 450
Christmas hampers were given away

In 1927 while relief work has been
carried on steadily throughout the
present year. Every case of relief
work is checked up to establish its
genuineness and to prevent imposition.
If you have any contribution to make
to this fund please send it in as soon
as possible. Assistance of any kind
will be greatly appreciated by the
needy when the Christmas season is
over. So do your bit if you can.

Composing Room Divulges Secrets

The cut above was reproduced from a collection of photographs plus a little art work, and it came about this way. There was a need for an illustration to brighten and balance the page. So we looked through the files. The photograph of the new Canadian Pacific engine came to light first, but, while it illustrates the largest passenger engine in the British Empire, our readers already knew all about it. Put it on one side! Then we saw the picture of the ox which is engaged in shunting freight cars at Trieste. This we thought we could tie up to the engine in some way, but when we saw the photograph of the elephant at Kandy, we thought that it would be much better and easier to write a feature on, say, "power" or "World transport"! The African Zulu with the Ricksha would have helped a story of this nature, but when we saw the beautiful curves of the Lungwa Pagoda and the graceful lines of the Moon Arch in the garden of the Jade Tree Studio at Shanghai we thought that perhaps we could make an appeal of sorts to the cultural side of our readers. But the office boy was very keen on the locomotives, the make-up man thought he could design a better lay-out with just the animals, and our fair-haired stenographer considered the architecture more artistic.

We compromised by deciding to make a three-column instead of a two-column lay-out and using them all. What then remained was to tie them up in some way, so we got out our best-looking photograph of the "Empress of France," and—there you have a complete short story. One gets aboard a Canadian Pacific train first and at New York boards a Canadian Pacific steamship for the ports and sights of the world. The "Empress of France" doesn't really belong to the set, because this year she will not make a cruise, but, here she is last year at Rio de Janeiro. The "Empress" is replaced in cruise service by a "Duchess". Not that this makes a great deal of difference to your editor, but there are many readers of this page too, who will spend Christmas in the Holy Land, and cherry-blossom time in Japan. They will tour the West Indies in comfort in January or February. They will spend the winter in luxury travelling round South America and South Africa, round the world or round the Mediterranean. They have shown us their booklets, and before Spring is here again they will be showing us their tan and their souvenirs.

Incomes In the West

Within recent months numerous articles have appeared in print dealing with the progress and prosperity of the western provinces of Canada in which the wonderful fertility and productive capacity of the agricultural lands of the West, yielding hundreds of millions of new wealth annually, has been referred to, and the fact noted that in per capita wealth of the people these newer provinces of the West have outstripped the older provinces of the East.

A correspondent of a western farm journal, having read these articles, asks: "Why, with such tremendous accomplishments to our credit, have not western farm men and women acquired a per capita income that would permit us to maintain comfortable, nicely decorated, well equipped, modern homes with some time to play as well as to work?"

The question is a pertinent one, but, at the same time is not its general effect to create a false impression of actual conditions of farm life in the West? Nevertheless, it is deserving of an answer.

In the first place, it is well to consider that in no part of Canada, and probably in no place in the world, is the wealth of the country so evenly distributed among all the people as is the case in Western Canada. In Eastern Canada, and to an even greater extent in the United States and the older countries of the world great accumulations of wealth are possessed by a few individuals, families and corporations, while living in the same communities are hundreds of people, some in dire poverty, and others living from hand to mouth day by day, and denied the real comforts and joys of life. On the other hand, take Saskatchewan as an example,—the third most populous province of Canada, with now close to one million people, but which alone among the provinces is not credited with even one millionaire.

This is not to say there are no poor in Western Canada. Unfortunately there are. But the further fact is to be remembered that this West is a new country,—the newest in the civilized world,—and that tens of thousands of its people have only resided here a comparatively few years, most of whom came to better their condition and get a start in life which was denied to them in the lands from which they came. The fact that the per capita wealth of the West is high in comparison with the East, while the available per capita income to provide the necessities and pleasures of play time is alleged to be small, is accounted for because the per capita income has been invested in breaking new land, establishing new homes, securing the necessary equipment wherewith to develop farm holdings, make improvements, and, generally, building for the future. These investments represent per capita wealth, which is consequently high and steadily rising.

The true test to apply to Western Canada is: Are our farm homes becoming more comfortable, better equipped, more modern, as the years pass? Are the people who have come to this country decidedly better off, more comfortable and happy, than they were in the lands from which they came? Are they making real progress? Unquestionably, taking the country as a whole, such questions must be answered in the affirmative.

Finally, is it true that the per capita income of the Western farmer does not permit him and his family to enjoy the conveniences of, and pleasures of modern life? The telephone is one of the conveniences of modern life, and Western Canada ranks high among the countries of the world in the number of telephones in rural homes. The radio is another such convenience, a source of instruction and pleasure, and western farm homes are filled with them.

Or consider the automobile. Next to the United States with its many great cities, Canada surpasses the world in motor cars per capita, and these Western Provinces, mainly a rural people, possess as many cars in proportion to population as do the older provinces.

The rapidly increasing number of farm homes surrounded by trees and gardens testify to the fact that, as the pioneer days pass, incomes are sufficient to provide for the beautification of the home outside, and the same process is going on inside countless rural homes.

Nor would it appear from the ever increasing number of rural residents who visit the southern states, Eastern Canada, and the Pacific coast during the winter months, that the net income from farm operations is totally inadequate to provide some play time.

Nor must the fact be ignored that the provision of good roads, good schools, community halls, churches, and other conveniences of life, are, in the final analysis, provided,—either through taxation or voluntary contribution,—out of the per capita income. It has been sufficient to provide and maintain these things in this new country on a scale, and in a short space of time, unsurpassed anywhere.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Alberta Hail Insurance

Companies Ask For 48 Hour Time Limit In Accepting Policies

Relief in the form of amendments to the hail section of the Insurance Act is being asked by the hail insurance companies in Alberta, the amendments to be enacted at the next session of the Legislature, according to Henry Brace, Superintendent of Insurance in the Provincial Government.

There are operating in the Province at present more than 50 companies handling hail insurance and their request for relief has been occasioned by the losses caused by hail during the last summer amounting in Alberta to approximately 120 per cent. of premiums. In Saskatchewan conditions were little better, losses amounting to 92 per cent. of the premiums.

The main feature of the requested and suggested amendments is the time limit of acceptance or rejection of a policy be extended from 24 to 48 hours.

At present a farmer can wire or phone his desire for coverage to the insurance company and the coverage commences at that time. The companies want to have 48 hours elapse between the time of filing notification for coverage and the time at which the coverage will be either accepted or rejected. By this means it is hoped to overcome any suggestion of delaying the placing of insurance until the last possible moment.

The present law provides that it is optional with the companies whether they accept applications by wire or telephone and it is understood that they have decided to refuse any applications made by this method.

Speaking in respect to the amendments, Mr. Brace said that it was his opinion that farmers must play the game with the companies if they desired them to remain in the field and that business should not be confined to a six weeks' period in the middle of the summer, but should be spread over the entire growing season.

A LAUGHING BABY IS A GREAT JOY

What can give more joy in the home than a laughing, happy baby. The well child makes everyone happy with his tuneful gurgle and bright, laughing eyes. It is only the sickly baby who is not a laughing baby, for it is the little one's nature to be happy when well.

Mothers, if your baby is cross, if he cries a great deal and no amount of attention seems to make him happy, give him a dose of Baby's Own Tablets and he will soon be well and ready to radiate that happiness through the home again.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels and sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fevers and correct those troubles which accompany the cutting of teeth and in doing those things—and doing them well—they make baby happy and keep him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Civic Land Department

City Of Calgary Sells Land To Value Of \$85,000 In Month Of October

Land sales totalling in the neighborhood of \$85,000 were negotiated by the civic land department of the City of Calgary during the month of October, representing the greatest total of new sales ever recorded since the department was opened in 1922. The total sales of the department for the year are expected to grow into an enormous figure and, with millions of dollars worth of land still available for sale, this department has become a permanent part of the city service.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Recipes For This Week

(By Betty Barclay)

MARSHMALLOW SURPRISE

- 1 package chocolate junket.
- 1 pint milk.
- 1/4 pound marshmallows.
- 1 cup confectioners' sugar.
- 1/4 cup boiling water.

Prepare chocolate junket according to directions on package. Cut marshmallows in pieces and melt in double boiler. Dissolve sugar in boiling water add to marshmallows, and stir until thoroughly blended. Turn into a bowl and cool before serving on top ice cold chocolate junket.

PENNSYLVANIA COLE SLAW

Put two pounds of firm, crisp cabbage through the slicer. Add a dressing made from:

- 2 eggs beaten light.
- 1 cup cider vinegar.
- 1 cup water.
- 6 scant teaspoons sugar.
- Salt to season.
- Butter size of walnut.

Cook slowly for few minutes until thoroughly mixed. Stir tablespoonful flour thinned in water into mixture and cook for five minutes over slow fire. Cool, thin with cream, then pour over sliced cabbage and mix thoroughly. Finely-chopped cabbage may be used instead of sliced.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Anglo-Japanese Alliance

Will not Be Revived, Says the British Foreign Office

The British foreign office, after the appearance of press dispatches in London newspapers from Japan discussing a possible Anglo-Japanese alliance and the position of the powers in China, let it be known that there is no question whatever of revival of the alliance, which was ended in consequence of the Washington conference.

As regards China, it was authoritatively stated that Britain, like the other powers, is pledged to consultation and co-operation.

Britain claims to be the world's workshop for aircraft, ships and locomotives.

Nursing Record In Two Continents Hard to Equal

Nurse Waite of New Brighton writes: "While nursing in New York, in my early twenties, I was poisoned by food, my sister nurse recommended your wonderful Vegetable Laxative Pills."

"I am never without them and have prescribed them for thousands of my patients who were suffering with indigestion, gas and sour stomach, biliousness, sick headache and indigestion caused by constipation poisoning."

Gasolene From Shale

Find New and Important Reserve Sources Of Motor Fuel

Pressure-cracking tests on Canadian crude shale oil and on bitumen from bituminous sands show that these raw materials are important reserve sources of motor fuel. Gasolene yields of 18 to 20 Imperial gallons per ton of shale reported, and about 40 per cent. by volume of the dehydrated bitumen are reported. Other products from these oil and bitumen raw materials are appreciable quantities of good value coke and uncondensed gas of high calorific value. The quality of the gasolene from the shale oil may be considered good and that from the bitumen exceptionally good.

Favor All-Metal Planes

The Air Ministry has decided that in future all Royal Air Force planes will be built of metal instead of wood. A new revolutionary method of constructing planes' wings has been discovered as the result of experiments with a monster 150-foot wing spread monoplane "inflexible" at Croydon airdrome, it has been learned. The plane will carry ten tons of bombs.

Sneezing?

At the first sneeze inhale Minard's. Prevents colds, Also good for bruises and sprains.

EVEREADY Layerbilt

PROGRESS MADE IN PAYING OFF NATIONAL DEBT

Vancouver.—Hon. James A. Robb, minister of finance, dealt with the progress of Canada in paying off her national debt during the course of an address before the Canadian Club here. Mr. Robb said that during the five-year period ending March 31, this year, Canada had reduced her debt by \$136,000,000 or at the rate of more than \$85,000 per day.

In October of this year, Mr. Robb continued, \$53,000,000 indebtedness had been retired from current revenue. Next year he hoped to retire \$60,000,000 by the same method.

"We want to make a further tax reduction, but I am not going to say anything more about that just now," the minister remarked.

The demand for money for roads and other expenditures, added the minister, had led to some duplication in taxation between provinces and the Dominion. This was particularly true in British Columbia. Reduction of taxation in order to clear these fields was desirable.

In reference to foreign trade, Mr. Robb said Canadians should endeavor to get their products into the markets of the world and that the facilities for doing this were greater in Canada than in the United States. The United States had not as good a transportation system from its interior to its world ports as had Canada.

As for British Columbia there were few ports, he stated, that were as well situated for world trade as those of this province. Canada last year had traded with 114 nations and the port of Vancouver with 51 nations, an enviable record.

The minister added that most important to the expansion of the Dominion's foreign trade was the development of world friendships. Although foreign trade was desirable, trade within the empire was even more important. Inter-empire trade could not be developed, by singing "Tipperary" and the British ships could not be kept on the seas by "Rule Britannia." Something more practical must be done, the speaker declared.

"Canada need have no forebodings about her future," Mr. Robb said. "It is true that we have a big debt. But we must remember that Canada was in the war from the drop of the hat. We have asked no favors from anybody. There were difficult times for my predecessors during the war and during the period immediately following it, but in 1924 we turned the corner."

"We might well unite on a policy of saying all the good things we can about our country. The days of sailing ships are gone and we must remember that what we say today will be read by the world tomorrow."

Buys Own Exhibit

Herman Trelle Pays Stiff Price For Half Bushel Of Wheat

Toronto.—Four hundred dollars represents a stiff price for a half bushel of wheat but that is what Herman Trelle, the wheat and oats king from Wembley, Alta., paid at the Royal Winter Fair for his own sample prize-winning half bushel during the auction sale for the grain samples which scored the ribbons.

In his capacity as oat king, Mr. Trelle also paid \$100 for his second prize oat sample, and the same for a half bushel of red-ribbon chancelor peas.

Under the conditions of entry, prize exhibits must be sold, but there is nothing to prevent a prize winner from bidding on his own exhibits. The money from the sale is given to the exhibitor, less a commission taken by the Winter Fair.

Air Mail Service Speedy

Winnipeg, Man.—The air mail service to be inaugurated in the prairie west, December 10, will make it possible for correspondence to be delivered at Regina, Saskatoon, Calgary and Edmonton the same day as it is written. As well, despatches for those cities will contain mail for adjacent or connecting points to be forwarded by next mail.

United Grain Growers Ltd.

Organization Shows a Very Substantial Year's Business

Copies have been received of the balance sheet and the annual report presented at the twenty-second annual meeting of United Grain Growers Limited, held in Calgary last week, and these show that Company to be in a highly satisfactory position.

The profit and loss account for the fiscal year ending August 31st, 1928, showed gross earnings of \$3,547,315.00 against expenses of \$2,141,068.00. Interest on bonds, mortgages and debentures amounted to \$193,141.00, depreciation to \$298,273.00, leaving the net profit, subject to government taxes at \$714,831.00.

The surplus carried forward from the previous year amounted to \$556,782.81, and the addition of the year's profit made a total of \$1,271,613.00. From this deductions were made for shareholders' dividend at 8 per cent. per annum, \$243,156.00; for patronage dividends, \$114,756.00; the general reserve \$185,011.00, and the depreciation reserve \$226,315.00, leaving to be carried forward \$502,373.31. Current assets, amounting to \$5,873,102.00, were more than double current liabilities of \$2,925,134.00. Capital assets total \$9,115,243.00, against which there is provided a depreciation reserve of \$2,300,000.00, while the capital liabilities amount to \$1,563,554.00. Paid up capital stock amounts to \$3,096,695.00, while shareholders' capital and surplus amounts to \$5,299,068.00.

The annual report showed that the Company, besides completing new terminal elevator at Port Arthur, the capacity of which is 5,500,000 bushels, and which was under construction at the time of the last annual meeting, had made considerable progress in the development of its country elevator system. Between September 1st, 1927, and August 31st, 1928, 70 country elevators were built and purchased, with a number of others placed under construction since that date. At 11 points elevators were torn down and replaced with modern houses, while 27 elevators were sold during the year. Elevators are now operated at 413 points in the three prairie provinces.

Winnipeg representatives returning from the annual meeting, report it to have been one of the most successful and satisfactory in the history of the Company. Not only is the Company in a better financial position now than it has ever been, but, judging from expressions of opinion on the part of delegates, it has never stood higher in the general regard of western farmers. The delegates showed their satisfaction and confidence by prompt acceptance of the reports presented to them and by re-election on the first ballot of the four retiring Directors. The whole meeting indicated complete confidence and satisfaction in the conduct of the business by the Management and the Board of Directors.

Deadly Level Crossing

Mortlach, Sask.—Two farmers of the Secretan district, Edwin Gunderson and A. J. Toner, bachelors, lost their lives at Bucknell's Crossing, two miles east of here, when the Chevrolet sedan Gunderson was driving, was struck by an eastbound C.P.R. freight train. Gunderson was killed outright, and Toner lived about two hours, dying on passenger train No. 2, as he was being rushed to Moose Jaw Hospital.

Increase In Immigration

Ottawa.—Immigration to Canada for the seven months of the present fiscal year ended October 31, amounted to 131,754, compared with 118,158, for the same period a year ago. This represents an increase of 11 per cent. Many Canadians during the same period returned from the United States to take up permanent residence in the Dominion.

Farmers Declare Against War

Saskatoon.—Pledging themselves not to support any candidate for parliamentary honors unless he would openly declare himself against war and conscription, 67 delegates representing practically every local in district 10, of the United Farmers of Canada, in conference here, passed a resolution to that effect.

Your work would not be so hum drum if you put more hum into it.

FRENCH MINISTER TO CANADA

M. Jean Knight, new French minister to Canada, who has arrived in Ottawa and has presented his credentials to the governor-general.

Alberta's Resources Up For Discussion

Conference In Ottawa For December 12 Has Been Arranged

Edmonton.—Natural resources and Alberta's chances for getting them will be up for consideration again on December 12, in Ottawa, Premier Brownlee has received advice from Hon. Mackenzie King that that date will be most suitable from his point of view and he has replied accepting it as satisfactory also to the Alberta side of the case. Hon. R. G. Reid, provincial treasurer, will accompany the premier to Ottawa for the conference.

That something definite and perhaps final will result from the round table discussion of the question, after a year's rest, is Mr. Brownlee's hope.

The idea, he takes it, is to canvass the situation thoroughly and arrange the basis upon which a settlement can most advantageously be effected. From the province's standpoint it is thought some help toward such a settlement has been given by the disposition that has been made of the Manitoba case.

Say Complaint Justified

Better Accommodation Needed For Horses At Winter Fair

Toronto.—Exhibitors and management at the Royal Winter Fair are unanimous in the opinion that the complaint of Professor W. L. Carlyle, manager of the "EP," ranch, who refuses to show any of the Prince of Wales' horses at the fair until new accommodation is provided is justified, according to The Toronto Telegram. While the fair management are aware of the poor housing, they say they have no alternative accommodation to offer, but it is hoped, with the aid of the Federal and Provincial governments, that something will be done in the immediate future to alleviate the situation.

Gathering Data Of Industries In West

Plan To Divide Prairies Into Sections For Investigation

Winnipeg, Man.—Acting on the suggestion of the Manitoba Industrial Development Board, the Natural Resources Intelligence Service, at Ottawa, has prepared a plan for gathering data relative to the logical industrial progress of the prairie provinces that will be submitted to boards of trade and other interested bodies.

The Ottawa suggestion is that the West be separated into five leading manufacturing centres for the purposes of the investigation and procedure on co-related lines, the first group consisting of Winnipeg, the second of Moose Jaw and Regina, the third of Prince Albert and Saskatoon, the fourth of Calgary, Lethbridge and Medicine Hat, and the fifth of Edmonton.

Ottawa suggests that the following circumstances in each of the groups be investigated: Manufacturing facilities, development of related industries, natural resources adjacent to the centres, duplication of production, suitable new industries, transportation and reference to the effect of the Panama Canal route to the Western market, new marketing methods, branch plants, and industries chiefly affected by transportation.

Would Hold Navy Parley In Canada

Might Help Solve Problems Says U.S. Senator

Washington.—Chairman Britten, of the House Naval Affairs Committee, thinks he has a plan that would help the United States and Great Britain to arrive at an understanding on the equality of sea power and naval problems generally.

He has put forward his ideas in a cablegram to Right Hon. Stanley Baldwin, Prime Minister of Great Britain. He suggested that members of the House Naval Affairs Committee and a committee from the British Parliament hold a joint meeting in Canada after March 4.

Will Lose Franchise

Toronto.—Any person whose name is included in the list of tardy city income tax payers in Toronto will not be able to vote in the municipal elections on New Years Day unless he can produce his tax receipt, according to a ruling by City Clerk Somers. There are more than 20,000 persons who have not yet paid their tax.

Famine In China

London, Eng.—The Daily Express Feking correspondent says that an urgent famine situation has arisen. With 20,000,000 destitute and starving people in seven provinces of Northwestern China, governors of the provinces fear uprisings unless relief is immediate.

BRITISH NAVAL ACCORD WITH U.S. MAY BE REACHED

London, Eng.—Viscount Cecil, of Chelwood, in a speech before the League of Nations parliamentary committee of the House of Commons, said that he believed a naval agreement with the United States might be reached.

"The fundamental difficulty encountered in every disarmament discussion rests on the fact that the problem is treated too little as a matter of large politics and too much as a matter for experts with whom the whole discussion is based and on assumption of war and attack," he said.

On this basis, no progress is possible.

Lord Cecil said the first step in any general disarmament agreement must be an accord between the United States and Great Britain.

"It is manifestly to our interest to accept without reserve the United States absolute parity," he asserted. "I favor absolute and complete mathematical equality both in tons and guns. I believe on this basis a full agreement can be reached." He then turned to the development of such an accord into a world-wide agreement.

Lieut.-Commander Joseph M. Kenworthy, Labor member, will ask Prime Minister Stanley Baldwin in the House of Commons what reply he is sending to the suggestion of Fred. A. Britten, for an Anglo-American parley in Canada on the cruiser problem.

Ask For Protection

National Dairy Council Wants Protection For Dairy Industry

Toronto.—The National Dairy Council, of Canada, at the concluding session of the annual meeting here, passed a resolution reaffirming the council's stand in asking adequate protection for the Canadian dairy industry. J. A. Caulder, Regina, president, declared that the dairy industry of Canada should be given a fair chance against all competitors and he contended that the industry was not being fairly treated at the present time.

A resolution favorable to the compulsory pasteurization of milk in cities, towns and villages was unanimously adopted while a policy for selected registration of dairy cattle and milk recording also was endorsed.

Soviets Elect Woman Mayor

Factory Worker Now Head Of Large City In Republic

Gomel, White Russia, U.S.S.R.—A woman factory worker, Tatiana Prusakova, has just become mayor of Gomel, one of the largest cities in the White Russian Soviet Republic.

Since childhood Prusakova worked in the local match factory. After the Revolution she became active in the Soviets, and now she has been elected President of the Gomel Soviet, a position corresponding to mayor or burgomaster.

Will Develop Produce Markets

Victoria, B.C.—Development of a marketing branch of the department of agriculture which will aim to develop new and existing markets and give farmers accurate information of existing markets was the announcement of Premier S. F. Tolmie, who declared that the first work of this department would be to begin a complete survey of all markets available and the choosing of the best men for such work.

Million In Royalties

Trenton, N.J.—Two thirds of the royalties from the reproduction of Enrico Caruso's voice on phonograph records were awarded to Miss Gloria Caruso, young daughter of the famous singer. The royalties are estimated to amount to about \$1,000,000. Gloria was also awarded half the New Jersey estate.

Manitoba Resources

Ottawa.—The first public hearing in connection with the return of the natural resources to the province of Manitoba, will be held in Ottawa on February 10, 1929.

An Empress on Holiday

Here the Canadian Pacific Empress of Australia, having completed her last trip of the season to Quebec, is seen in the floating dry dock at Southampton where she is receiving a first coat of paint prior to setting out on a cruise of the world. Some idea of the great size of the Empress may be gained through comparing her with the two men in the small boat tied to the dock in the foreground.
